

A WALK BACK IN TIME OF GRANDMAS AND GAME SHOWS!

Hollywood Squares Wreath

WUMFA 2021

Julia Marie P Schmitt AIFD, CFD, ICPF, EMC, PFCI

Hard Goods

Styrofoam Wreath

Midnight OASIS

Hot Glue Gun

Mulberry Fabric

Botanicals

2021 WUMFA Virtual Conference

Roses 'Shimmer'
Carnations 'Antique Babylon'
Peach Carnations
Peach Mini Carnations
Kalanchoe Hot Pink
Eriostemon
Seeded Eucalytus
Eucalyptus

Step 1

Creating Your Form

Using a sharp utility knife, carve out a channel 1 inch wide by 2 inches deep on the inside part of the Styrofoam wreath. DO NOT Cut entirely through the Styrofoam. Leave at least a half inch of foam on the outside edge of the wreath form. Create a channel that is approximately 2/3 to 3/4 the entire inside length of the form.

Pro Tip: Start by creating a small hole and slowly chisel out the Styrofoam. When the hole becomes larger, continue to scrap the Styrofoam until you reach you desired depth. The key is to slowly carve.

Step 2

Creating Visual Interest

Tear the Mulberry Fabric into strips.

Using a hot glue gun, attach the fabric to the Styrofoam Wreath form. In order to create the desired textural effect, crinkle the fabric and hot glue one layer on top of another. This will create wonderful visual impact. Cover the entire surface of the wreath leaving the carved section uncovered.

Step 3

Fill the carved section with pieces of soaked Midnight OASIS. You will need to cut pieces that fit snugly into your channel. This will be your water source for your Botanicals.

Step 4

The Finished Product

Decide which direction you would like to hang your wreath. Then, insert the botanicals into the form. Display and enjoy!
